

Alert Boat Owners!

The Santa Ana Regional Water Quality Control Board is attempting to pass regulations which will require **you** to submit a plan on how **you**, will repaint your boat hull within 8 years with an anti-fouling paint (AFP) that has, "no significant adverse environmental impacts". The copper TMDL is unlawful because alternatives to copper AFPs are not effective nor available!

We need your support either in attendance, emails or letters. Join fellow boat owners for the upcoming workshop May 9th and May 10th see details below. We **must respectfully request that they not adopt amendments to R8-2018-0071!**
